SUMMARY

Self-taught frontend developer with deployed production projects. Skilled in React, JavaScript, and CSS with a strong eye for UI and design. Comfortable working with REST APIs, component architecture, and Git-based workflows. Seeking a frontend or web development role to build real products.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)

Frameworks: React, Tailwind CSS

Tools: Git, GitHub, Vite, Vercel

Concepts: Responsive Design, Component Architecture, REST API Integration, localStorage, Performance Optimization, UX Design, Behavioral Logic, Debugging

PROJECTS

Favdex — React | Tailwind CSS | PokéAPI

Live at – <https://favdex.vercel.app>

Most Pokédex sites are boring data dumps. Built Favdex to be visual-first with shiny toggles, sprite styles, audio, and a berry-feeding mechanic to keep users coming back daily. Debugged a race condition in HTML5 Dialog — Enter key triggered open-then-immediate-close due to browser key event sequencing; resolved with `event.preventDefault()`. Deployed on Vercel via GitHub.

Track Talk — Vanilla JavaScript

Live at – <https://track-talker.vercel.app>

Behavior-based expense tracker that forces accountability. 24-hour locks make expenses permanent, and a roasting engine tracks edit/delete patterns to catch you hiding spending or lying to yourself. Casual spending gets a reminder. Editing or deleting too much gets constant taunting. Built with localStorage persistence.

EDUCATION

Computer Operator & Programming Assistant (COPA) — Govt. ITI Rourkela | 2025 – 2026 (Pursuing)

12th — Commerce — CHSE Odisha | 2025

CERTIFICATIONS & TRAINING

Diploma in Computer Applications (DCA) — Grade A+ | NSDC / Skill India | 2023

Industrial Observation Training — 1 Month at Rourkela Steel Plant (SAIL) | 2026
